RING SIZER TOOL

Use this handy tool to measure the circumference of your finger and work out your most suitable ring size.

*How to use the Ring Sizer Tool:*

1. Print out this document, making sure to print it at 100% to ensure the correct scale.
2. Carefully cut around the template and through the slit at the top.
3. Wrap the ring sizer around your finger and insert the thin end into the slit.
4. Adjust until it is sitting comfortably around your finger (don't pull it too tight!), checking that it can be moved from the base of the finger up over the knuckle with ease.
5. Check the corresponding letter on the ring sizer tool and there you have it, you've got the right ring size.

10p

*Place a 10p coin over the circle to ensure the guide is printed to the correct scale.*
